

## Clean Lakes, Inc. and Vertex Water Features Aeration and Fountain Systems

Clean Lakes, Inc. congratulates Vertex Water Features on 15 years of aeration leadership! We are pleased to have entered our 5<sup>th</sup> year as a Vertex Water Features authorized dealer and look forward to continuing to work together. All Vertex aeration systems installed by Clean Lakes, Inc. over the past 5 years continue to operate, which is a testament to the research and development that Vertex has invested to provide a high quality product backed by knowledgeable sales, service and research staff. Key to long term successful operation of aeration systems is ensuring that simple maintenance tasks such as ensuring that air filters are inspected and cleaned or replaced regularly are carried out. Dusty conditions or excessive flower seed head fluff can clog air filters causing damage to air compressors. Cleaning air filters is an easy process requiring no special tools and only a few minutes of time.

### Compare *Vertex* aeration systems to all others and discover “The *Vertex* Advantage”

- Last Longer = 5 Year “no questions” warranty!
- Less Maintenance = self cleaning!
  - Eliminates the need for removal from Lake Bottom and the time consuming, hazardous muriatic acid cleanings required of out-dated air stones!
- Less Operating Costs = more energy efficient!
  - Requires only 0.5 cfm per disc - aerate up to an 18 acre lake with 2/3 hp!

Higher Performance = Independent tests confirm over 37,000 GPM/hp! Provides higher lake turnover rates with less power consumed=saves you money
